

The following is provided as a *general guide* for students to focus their study for the test. References are taken from the class text: *College Algebra* (5th edition) by Beecher, Penna and Bittinger. While none of these *exact* problems are on the exam, they will closely resemble the objective and format of the listed questions.
There is not a one to one correspondence.

Primary Study Material:

Chapter One Summary and Review, Chapter Test

Additional Study Material:

Section	Problems
Just-in-Time 1-25	Multiples of 3
1.1	13, 21, 31, 39, 47, 55, 69, 81, 89
1.2	7, 19, 23, 31, 41, 59, 67, 75, 81
1.3	5, 11, 23, 35, 45, 51, 55, 77
1.4	7, 15, 25, 33, 41, 45, 51-56, 59
1.5	3, 15, 29, 33, 41, 50, 61, 71, 80
1.6	7, 15, 17, 21, 25, 33, 35, 45, 50
